

1 Overview

QC analysis of raw materials, in-process and finished products and verification, wet chemistry, environmental monitoring and monitoring of storage conditions ensuring cGMP/cGLP compliance at all times.

Also Known As: Raw Materials, In-Process, Finished Products Chemist/Analyst/Technician

2 Qualifications

- Tertiary qualifications in chemistry
- TAFE qualifications

3 Salary Range

Permanent \$35,000 – \$55,000 pa

4 Previous Positions

- Laboratory Analyst
- Laboratory Assistant
- Laboratory Technician
- QC Chemist
- Graduate Chemist
- Raw Materials Analyst

5 Industry Background

- Pharmaceutical
- Animal Health
- Complementary Medicine
- Consulting Laboratory
- FMCG (personal care, cosmetics, h/hold products)

6 Career Progression

- Validation
- Method Development
- Stability
- Quality Assurance
- Documentation
- Laboratory Supervisor

7 Typical Responsibilities

- QC production support and stability testing on incoming and R&D products
